2016 Grace Hopper Awards Call for Nominations

Thank you for your interest in the Seattle Girls' School Grace Hopper Awards nomination process! We welcome and appreciate your participation as we honor visionary Northwest women who are leaders in their community and have made significant contributions either directly in their chosen field, or have encouraged women to choose and create their own pathways to success and achievement. The recipients of these awards also exhibit innovativeness, are collaborative in their work, and complement SGS's mission to integrate learning and problem solving into any environment. As this is a Northwest award, nominees can reside in **Alaska, British Columbia, Idaho, Oregon, or Washington State**. The two winners of the Grace Hopper Awards will be honored at our 14th Annual Seattle Girls' School Luncheon, to be held at The Westin in downtown Seattle at noon on May 5, 2016.

Nomination materials must be postmarked by Friday, January 22, 2016.

Grace Hopper Outstanding Achievement Award

Honors Northwest women who have achieved greatness in their chosen field.

Grace Hopper Exemplary Leadership Award

Celebrates professional Northwest women who have made an outstanding commitment to creating pathways and encouraging women to become leaders in their own community.

About Seattle Girls' School

The mission of Seattle Girls' School (SGS) is to inspire and develop courageous leaders who think independently, work collaboratively, learn joyfully, and champion change. SGS is committed to empowering young women to be leaders in their communities through a challenging academic program focused on collaboration, integration, and real-world problem solving. Serving students in grades 5-8, we are dedicated to inspiring each and every girl to live her potential by creating a diverse community of learners who are encouraged to be passionate, thoughtful, and respectful agents of change. Providing our students with positive role models, such as the Grace Hopper Awardees, is a critical part of our mission.

About Grace Murray Hopper

Grace Murray Hopper (1906-1992), was a mathematician, computer scientist, systems designer, and programmer. Her groundbreaking work as a mathematician and computer scientist led to the development of the computer language COBOL. She is more famously known as the 'mother of the computer' and was the first female Admiral in the US Navy. With the tremendous spirit of Admiral Hopper at heart, we celebrate women who have excelled remarkably in their field.
